

Abishek N

AWS Cloud Engineer | DevOps Engineer

abisheknatarajan01@gmail.com | +91 6382625461 | [linkedin/abishek-n](https://www.linkedin.com/in/abishek-n)

AWS Cloud Engineer with close to 4 years of experience in cloud infrastructure, automation, and CI/CD pipelines. Hands-on with EC2, S3, RDS, VPC, IAM, and CloudWatch. Strong in provisioning AWS resources, configuring secure networking, monitoring systems, and supporting cloud migrations. Experienced in Linux administration, Python scripting, and ensuring high availability of production environments. Certified AWS Solutions Architect with a track record of reducing costs and improving system reliability.

Technical Skills

AWS Core Services: EC2, S3, RDS, VPC, IAM, Lambda, EKS, ECS, ELB, ALB/NLB, SNS, Route53, CloudWatch, Security Hub, Secrets Manager

Networking & Security: VPC design, subnetting, routing, security groups, IAM policies, RBAC, encryption, least-privilege access

Infrastructure as Code: Terraform, AWS CloudFormation, Ansible

CI/CD & SCM: Jenkins, GitHub Actions, AWS CodePipeline, AWS CodeBuild, Git, GitHub

Containers & Orchestration: Docker, Kubernetes (EKS), Helm, Amazon ECS

Monitoring & Logging: CloudWatch, Prometheus, Grafana, ELK Stack

Scripting & OS: Linux Administration, Bash, Python, YAML

Other Tools: Maven, Nexus, SonarQube, Trivy, Jira, Confluence, Gradle

Experience

HCLTech - 3 Yrs 11 Months

Chennai, India

AWS Cloud Engineer – Software Engineer

Apr 2024 – Present

- Provisioned and managed AWS resources including EC2, S3, RDS, and VPC to support scalable and reliable production workloads.
- Configured networking and security using VPC design, subnetting, routing tables, security groups, IAM policies, RBAC, and AWS Secrets Manager.
- Monitored infrastructure using CloudWatch metrics, logs, dashboards, and alerts, reducing incident detection time and improving response.
- Supported cloud migrations by automating infrastructure provisioning with Terraform and Ansible, cutting provisioning time by 70%.
- Ensured high availability and backups across multi-region AWS environments, improving system resilience and reducing manual errors by 15%.
- Troubleshoot deployment issues and provide production support through on-call rotations, ensuring continuous service availability.
- Resolved 10,000+ security findings using AWS Security Hub, enforcing compliance with cloud security policies and audit requirements.
- Built and maintained CI/CD pipelines using Jenkins, AWS CodePipeline, AWS CodeBuild, and GitHub Actions for containerized application deployments.
- Deployed applications on Amazon ECS and Amazon EKS, ensuring scalability, performance, and reliability.
- Integrated SonarQube and Trivy into CI/CD workflows, improving code quality by 35% and reducing critical vulnerabilities by 45%.
- Led AWS cost optimization initiatives saving approximately \$3,000/month (75% reduction) through EC2, EBS, RDS tuning, S3 lifecycle policies, and automated scheduling.
- Maintained cloud infrastructure documentation and SLA reports, supporting smooth delivery and service commitments.

Graduate Engineer Trainee

Oct 2022 – Mar 2024

- Administered AWS environments including EC2, VPC, S3, IAM, and RDS, ensuring high availability and fault tolerance for production workloads.
- Automated EC2 and RDS scheduling using AWS CloudFormation, reducing infrastructure costs by 10–15% based on usage patterns.

- Designed and managed secure VPC architectures including subnetting, routing, and security group configuration.
- Managed data backup, restoration, and secure data transfers across AWS services.
- Configured CloudWatch metrics, logs, alerts, and dashboards, improving incident detection and reducing MTTR by 40%.
- Performed root cause analysis and troubleshooting for deployment issues in production environments.
- Assisted in day-to-day DevOps operations, platform monitoring, and issue resolution across environments.

Certifications

AWS Certified Solutions Architect – Associate | Amazon Web Services

HashiCorp Certified: Terraform Associate (003) | HashiCorp

Certified Kubernetes Administrator (CKA) with Practice Tests | Udemy

Education

Bachelor of Engineering – Electrical & Electronics | Bannari Amman Institute of Technology,
Sathyamangalam Aug 2018 – May 2022

Personal projects

Kubernetes Deployment Platform – Jenkins, ArgoCD, Docker, EKS

Built a secure CI/CD pipeline to deploy Dockerized applications on Amazon EKS using Jenkins, Helm, and ArgoCD. Implemented blue-green and canary deployment strategies for zero-downtime releases, improving deployment reliability and rollout speed.

Cloud-Native AWS Infrastructure Automation using Terraform

Created modular Terraform templates for VPC, EC2, and EKS. Configured remote state storage using S3 and DynamoDB. Implemented automated provisioning pipelines and IaC best practices for scalable AWS infrastructure.
